

PORTABLE TOILET HIRE

A variety of portable toilets are available for use in the building and construction industry, as well as for use at outdoor functions

The toilets range from the basic construction site portable toilet to the VIP trailer-drawn executive toilets for up-market functions.

GENERAL BENEFITS:

CONVENIENCE

- Having enough portable toilets on hand during outdoor activities helps visitors to use the restroom without having to walk too far. This is particularly true for events held on golf courses and outdoor venues, where there may be no nearby ablution facilities.

EASE OF USE

- There are several solutions available to meet the needs of all of your visitors. Handicap accessible portable toilets are designed with features like ramps and railings to make them easier to use. For added convenience, flushable toilets and portable washing sinks are available.

SANITARY

- Our staff takes care of the tedious toilet clean up, ensuring proper waste disposal. They are responsible for transporting the waste to a treatment plant.

CONSERVES WATER

- Some of our portable toilets use chemicals instead of flushing to reduce odours and save water. Very little water is used while flushing

BUSINESS BENEFITS:

COST EFFECTIVE

- Rather than building additional bathrooms for outdoor activities, it is more cost-effective to hire portable toilets. You won't have to worry about obtaining the requisite permits to build restrooms in public areas that will only be used for a short time.
