

SKIP TRUCKS

Skip Hire provides 3m³, 6m³ and 11m³ skips for all your non compactable waste needs. Our skip hiring service provides you with piece of mind that all your waste generated over the course of a project be stored within our skips and taken to the landfill for safe disposal once the skip has been filled.

GENERAL BENEFITS:

- Skip trucks are used for waste that isn't compactable such as construction waste
- Skips come in the following sizes to meet your waste disposal needs 3m³, 6m³ and 11m³

BUSINESS BENEFITS:

Skips can help your business save money

- Many waste disposal procedures necessitate transporting trash to a landfill. If you're working on a project that generates a lot of rubbish on a daily basis, you might have to go to the dump numerous times. This will save a significant amount of time and work.
- Skips help and maintain a neat and tidy look in your property.
- Because you are renovating your property, your outdoor space does not have to look unkempt. Skips assist you in maintaining an inviting appearance during such occasions.

CONSUMER BENEFITS:

Skips enhance safety

- Skips allow you to collect all of your trash in one location, keeping it all together and out of harm's way.

Skips are reliable

- While the council bins provide a secure way to dispose of your trash, there are size restrictions. When you have gathered too much rubbish in a day or two, they can be unreliable. Using a skip hire firm is a reliable choice as you can pick the skip size that best matches your needs.
